Executive Summary

Information Technology undergraduate at Rajarata University of Sri Lanka (2023–present; expected 2027), with hands-on project experience in full-stack web development, responsive interfaces, database-backed applications, and AI-assisted image processing. Familiar with React, Next.js, TypeScript, Node.js, SQL databases, and Git. Seeking a Web Developer Intern / Trainee opportunity to contribute to practical web application development.

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, Java, SQL, HTML, CSS
Web Development: React.js, Next.js, Node.js, Express.js, Tailwind CSS, REST APIs
Databases: MySQL, MariaDB, SQLite, Prisma ORM
AI / Data: Machine Learning fundamentals, Computer Vision, Image Processing, Data Analysis
Tools & Software: Git, GitHub, Visual Studio Code, Android Studio, Jupyter Notebook, Google Colab, XAMPP
Development Concepts: Authentication, Role-Based Access Control, Responsive Design, Database Design, File Validation

Soft Skills

- Team collaboration • Problem solving • Adaptability • Time management • Technical learning

Professional Experience & Projects

Janaza Welfare Society (JWS) – Welfare Service Management Web Application
Full-Stack Web Developer | Development / Production Preparation

- Developed a mobile-first platform for public Janaza and transportation service requests and request tracking.
- Built Admin and Employee workflows, role-based access, employee approval, task assignment, and task lifecycle management.
- Implemented secure task-photo review, public operations publishing, vehicle management, and employee profile controls.
- Created donation confirmation and verification workflows, PDF confirmations, and automated SMTP email notifications.
- Applied server-side validation and privacy controls for requester details, GPS data, uploads, receipts, and internal records.

Project outcome: Integrated public service access with administrative and employee operations in one web application.

AI-Guided Drawing and Coloring Assistant
Final-Year University Project | Web Application

- Developing a web-based application to help beginners learn drawing and coloring.
- Working with React.js, Node.js, Express.js, MySQL, and JWT-based authentication.
- Exploring AI-assisted shape extraction, outline refinement, shading, colorization, and artistic rendering.

Project outcome: Ongoing development of an AI-assisted learning and drawing workflow.

Water_Logger – Daily Hydration Tracker
Android Application Project

- Built an Android application for recording daily water intake and tracking hydration progress.
- Implemented local data storage and CRUD operations using SQLite.

Project outcome: Delivered a mobile workflow for logging and reviewing daily water intake.

Sparkling – Handwritten Digits Recognizer
Intelligent Systems University Group Project

- Contributed to a machine-learning project focused on recognizing handwritten digits (0–9).
- Worked with image processing and classification techniques as part of the project.

Project outcome: Handwritten digit recognition using a machine-learning approach.

Plant Analysis / Computer Vision Project
University Group Project

- Worked with notebook-based image analysis for leaf counting, leaf area, and plant-height estimation.
- Explored edge detection, image dimensions, and plant health indicator analysis.

Project outcome: Applied computer-vision techniques to multiple plant-image measurements.

Education

BSc in Information Technology (IT) | Rajarata University of Sri Lanka, Faculty of Applied Sciences
2023 – Present | Expected graduation: 2027

Certifications & Accomplishments

- AI/ML Engineer – Stage 1 — SLIIT, Faculty of Computing
- Python for Beginners — University of Moratuwa (CODL)
- Web Design for Beginners — University of Moratuwa (CODL)
- AI for Beginners — HP LIFE
- AI for Business Professionals — HP LIFE
- Data Science & Analytics — HP LIFE
- Introduction to Cybersecurity Awareness — HP LIFE
